

KSHETRA - Harmonization Audit Report

Generated 2026-09-28 03:15 UTC | Chandausi, Sambhal, Uttar Pradesh | EPSG:32644

CHAIN INTEGRITY

Status	INTACT
Entries verified	8 / 8
Chain head	09c5bda5cb9b5a944d8a9f7d3c26063a3725ca59193d2546...
Each entry carries a SHA-256 over its own contents and the hash of the entry before it. Altering any historical field breaks every link after it, so silent selective edits are detectable.	

HARMONIZATION RESULT

Positional RMSE	8.4529 m -> 3.127 m
Match F1 / ROC AUC	0.9993 / 1.0
Calibration error (ECE)	9e-05
Blocking recall	1.0
Geometric share of model	95.6 %

TOPOLOGY AND AREA CONSERVATION

Topology errors	6168 -> 215
Overlapping parcel pairs	5038 -> 0
Doubly-claimed land	18038.6 m2 -> 0.0 m2
Summed parcel area	423179.1 m2 -> 410996.0 m2
Parcel-sized holes refused	69

The summed parcel area falls because land recorded as owned by two parties simultaneously is counted once after harmonization. No land was created or destroyed. Holes the size of a whole parcel are flagged for ground survey and deliberately not filled; filling them would fabricate a boundary.

CHANGE AND ENCROACHMENT

New	31
Demolished	28
Extended	70
Heightened	59
Encroachment on public land	9 sites, 251.8 m2

Encroachment findings are advisory. This report is not a mutation record and carries no statutory effect; each finding requires verification on site by the competent revenue officer.
